

THE GLEICHEN CALL

VOLUME XXXVIII NO. 21

GLEICHEN, ALBERTA, WEDNESDAY AUGUST 8, 1945

SUBSCRIPTION \$1.00 PER YEAR

LOCAL NEWS ITEMS OF THE TOWN AND DISTRICT

Mr. McGorman and daughter, Ruth, of Calgary were weekend visitors to the home of Mr. S. Hampton.

Mrs. C. Thompson and Vivian returned last Saturday from the Pacific Coast where they spent the past month visiting her son Clifford.

P. O. Gordon Dunn of Calgary of Calgary spent the past week visiting Dr. and Mrs. Farquharson and Donald.

Mrs. E. W. Brown and family, Mrs. A. Wilson and family have been spending the past week at Bymore, Alberta visiting their mother.

Mrs. E. R. Bancroft and Miss Y. decaud are spending their holidays at the home of their sister, Mrs. A. N. McLeay.

Mrs. T. Plante has as a visitor her brother Henry J. Dargie, of Iron River Wis. This is the first time they have seen one another for a little over fifty years.

Wm. Payne was down from Calgary for a few days last week visiting his old friends.

J. E. Ostrander of Calgary spent a couple of days in town last week. He stated he was on one of his periodic visits to the old town to see his friends.

Every serviceman or servicewoman is entitled to free dental treatment after leaving the service as indicated by his final service examination. Application must be made within 10 days after discharge.

Our old friend M. Murray was in a happy frame of mind last Saturday. He informed us that he was thirty years married on August 4th but would wait until after the war to celebrate the occasion.

Mr. Henry Simmons was taken ill suddenly on Monday evening. We hope he will soon be on the way to recovery.

On leaving the armed services, members are entitled to transportation to their place of enlistment, or elsewhere if the cost is not greater.

Mr. and Mrs. Webb and family moved to Calgary on Monday where they will be in future residence. On Saturday evening their friends gave the a farewell party. Mr. Webb has for some time been contemplating moving and was unable to secure a house until a short time ago. As an inspector for the U.G.C. he believes he can handle his work better working out of Calgary. Mr. Webb was a very popular man in Gleichen and his friends are sorry to see him and his

The importance of DDT in controlling insects is well known to most farmers. At first, it soon will be, in limited quantities, and it will be about to be available for use in stables, dairies, etc. If preliminary experiments are continued, 34D or its related products will be equally important in weed control. It will destroy a wide variety of annual and perennial weeds, and be equally important in weed control. It will destroy a wide variety of annual and perennial weeds, and be equally important in weed control. It will destroy a wide variety of annual and perennial weeds, and be equally important in weed control.

Form Greenhouses, Aquia?

At this season, with most greenhouses empty, farmers may do much to prevent later losses from heating and infestation of farm-stored grain. Empty greenhouses should be thoroughly cleaned. Brush down walls and sweep floor with damp sawdust; then sprinkle a little hydrated lime over the floor and sweep it about to fill all cracks. Repair leaky roofs, walls, and especially floors. Where floors, either wooden or concrete, rest directly on the ground, a covering of moisture-proof material over the floor and extending up the walls for a foot or so will help to exclude ground moisture. Provide for good ventilation over the surface of the glass. A little effort now may save a lot of trouble later.

The longest Bailey Bridge ever built. Photo shows a general view of the Genney Bailey Bridge, one of the greatest engineering feats of the war.

family leave.

Mr. and Mrs. Leroy Koeford and family and Mrs. W. Sonerville are spending their holidays in Banff.

Mrs. J. Koeford who has been in the Holy Cross hospital for sometime is showing a slight improvement.

Before going back to Clivry Street, each serviceman or servicewoman is given a thorough medical and dental examination.

Jack Reid who has been overseas with the Canadian Army for the past six months returned to town last Thursday. As soon as his leave is up he will go to the Pacific war theatre.

L. Menard has painted the sidewalks with markings so that cars can park at a proper angle and not take up too much room. Most car drivers in this town and district have become highly deflected in parking their cars on the right side of the street and at the right angle. On Saturday afternoon the main street will fill with cars as the parking regulations give the street the appearance of order. Some cars have a habit of parking in front of the fire hall. This is not permitted. A sign painted on the doors would soon solve that problem.

Effective August 1st the wholesale price of soft drinks was increased to cents per case it is announced. Consumer prices are not affected. Board investigation disclosed that the reduced sugar ration might result in forcing many small bottlers out of business unless some adjustment were made. Increase was set at retail level because retail trade margins per case are today greater than they had been pre-war, the Board points out.

THOSE MEATLESS DAYS

Is the new plan to ration meat it is now clear that at least a million pounds of meat a week will be saved and at the same time Canadians will not suffer more than an inch or two around the wasteline.

This extra million pounds is, of course, in existence each week, and will promptly be diverted from its previous destiny (Canadian stomachs) to stomachs elsewhere in the world. Most of these will be in Great Britain. Canada is now to supply her with the amount of meat which was previously supplied by the United States under lend-lease. The United States supplies which formerly went to Great Britain are now going to be liberated and starving countries of Europe.

Although actual rationing itself is not yet in effect, the government by its declaration of two meatless days in public eating places and its suggestion that Canadian home tables do not grow unnecessarily under loads of meat on Tuesdays and Fridays have in effect started a kind of rationing.

The manner in which both hotels and restaurants, and the average Canadian family, are co-operating has not given the government and Canadians a sensible and sensitive peoples, fully aware of their own responsibilities as world citizens and alive to the needs of less fortunate humanity.

It is really a wonderful exhibition of citizenship, particularly since the obvious reason for shipping meat abroad (action fighting in Europe) has disappeared.

LOCAL NEWS ITEMS

Mr. and Mrs. Schelle left on Sunday for Waterton Lakes where they will spend a week's holiday.

Miss Helen Kelly of Calgary is spending her holidays in town the guest of her parents Mr. and Mrs. K. Kelly.

Mrs. E. W. Taylor and son Pto. Edgar Taylor are spending a few days at Turner Valley visiting Mrs. R. Lyon.

The summer holiday has begun in earnest. There is one grand rush of people getting away for a week or so when they will do nothing but loaf.

It is reported that Dr. McIntyre, local dentist, had an accident at Kimberley, B.C., and broke his collar bone. The doctor went to Kimberley on a fishing trip and details of his accident are lacking.

Those leaving the armed services may use their re-establishment credit to buy tools, instruments or equipment necessary in their civilian trade, profession or business.

S. Hampton accompanied by his two sons left Sunday night for Waterton Lakes for a week's holiday. Mr. Hampton who is an ardent fisherman does not resist the opportunity to take along his fishing rod. When he returns home he will have some good fish yarns to relate which will likely result in some of the local fishermen hastening down there to try their luck.

John Rodominsky and Les Robertson, R.C.N., left Saturday evening for eastern Canada from where they will rail for Scotland. In Scotland they will be given their final training before being sent to the Pacific to fight the sops of the Mikado.

Mrs. J. A. Menard returned home last week from the Peace River country where she spent a couple of weeks visiting her son Raymond, his wife and family.

Mrs. David Cooper and son Michael, Mrs. Frank Mitchell and wee son spent Monday in town the guests of Mr. and Mrs. W. F. Ferguson. While in town they called on all their old friends.

After living in Gleichen for the past 31 years Mr. and Mrs. Harry Carreck are preparing to move to the coast to live. Their sons live on Vancouver Island and they plan to make their home near them. Mr. Carreck has sold his house to Mr. Erford who will move in from his farm shortly. Harry will hold an auction sale of his household furniture on Saturday August 18, at 2 p.m. and will leave shortly after the sale for Vancouver. Thus Gleichen loses two more real old timers.

Under Canada's rehabilitation plan, veterans may use their re-establishment credit to buy, build, repair or modernize a house.

Today's veterans are able to use re-establishment credit to pay premiums on insurance issued by the Dominion government.

ST. ANDREW'S CHURCH
Sunday, August 12th.
Holy Communion, 11 a.m.
Rev. D. A. Ford, R.A., Incumbent.

Despite the heat in the Ottawa Valley, the Royal Commission on the taxation of co-operatives is scrutinizing a truckload of evidence which it collected from British Columbia to Nova Scotia.

The commission was empowered to examine the taxation regulations governing co-operatives, which at present are generally exempt from income and excess profits tax, if the bulk of their business is with members.

The figures are interesting. More than 600,000 Canadians are members of co-operatives; annual volume of their business is over \$500,000,000.

Naturally, being exempt from taxation, the commodities handled by these co-operatives are either directly cheaper than the commodities handled by private industry, or if the prices are parallel the members of the co-operative enjoy dividends which in effect bring down the price of the goods purchased through co-operatives. It is a simple deduction from this that the taxes which private corporations have to bear are really paid by the customers who purchase the commodities or services sold by such corporations.

It is therefore reasonable to expect that the Commission may advise that the best way to benefit the consumer is to let him purchase his goods through a co-operative or from a private corporation, is not to tax co-operatives but to remove corporate taxes so that corporations, co-operatives and others, may sell their products for lower prices.

Thanks to this government's policy, Canada is apt to become not only the aircraft production centre of the British Empire within the next ten years, but also one of the leading aviation countries in the world.

Canada is owner of many of the important raw materials needed for airplane production, and if not owner is very close to other sources of supply. Due to Canada's geographical position, aircraft made in Canada can be delivered by air to any part of the world, which was done during the war, in many contrast to the old practice of dismantling a completed aircraft and crating it for land and water shipment.

In addition to these important factors, Canada has a very large body of highly skilled mechanical workers and ground crew, and many excellent pilots and navigators. These young people have developed an enthusiasm which is going to be a major requirement during the next two decades.

The close control the government has maintained over aviation production and flying will therefore enable Canada to capitalize on her advantages and develop into a leading aviation country. This is a proved thing.

OUR COMPLETE SHORT STORY—

Orange Blossoms—Mock

— By —

W. FREDRICK KREUER

McClure Newspaper Syndicate

It was a pretty warm night and I thought everyone was down at the beach or out driving. I pulled my favorite chair over to the darkest corner of the porch and sat down to enjoy the glow of my favorite orange blossoms. So I was alone, except when I heard someone inside knocking on a door.

All the windows in the boarding house were open and I was sitting not three feet from Jerry Sloan's. His light went on, I pulled up to the door and said, "Uh—oh, it's you, Helen! I thought I was the only one in."

I was even more astonished then, because Helen's room was the one just around the corner and there hadn't been a light in there for some time. She must've been sitting in the dark—like Jerry.

"No," I heard her say, "I've been sitting in my room—thinking. I heard you moving around—and well, I need some ink. I want to write a letter but my pen and bottle are both empty. I thought maybe—"

"Letter?" Jerry almost choked on that word because he knew right away that what she was talking about. And so did I. Helen had a boy friend—an Old Faithful—who was always writing and asking her to come back home and marry him, but Helen was still trying to crack the ink bottle or something in the design line and that had kept putting him. Then Jerry moved in and she'd become even more undecided.

Then that last letter had come from the boy friend saying he was being sent to the west coast office of his company and he wanted Helen to go with him as his wife. But he said he'd like to have her first on Saturday or he'd take her for real.

And tomorrow would be Saturday and the last mail train to Calgary would leave in a half hour. This was a perfect setup for Jerry to tell her to forget about Old Faithful—but the thing that had kept them apart still stood between them. That was Jerry's bashfulness.

I peeped in the corner of his window and he sure had a forlorn drop to his big shoulders when he said, "Och, yes! You will have to get that letter off pretty soon. . . . I'll see if I have any ink."

I couldn't see Helen because she was standing out in the hall and Jerry's door was only half open. He had to duck because Jerry turned back into his room. I heard him move around as if he had a hard time finding the ink and then I saw the screen of his window swing free. He stuck out his big fat left hand and ink bottle on the mock orange blossoms below.

Well, that made me hopping mad for a minute—but my blossoms were black—and I was kinda peevish at his being such a slow poke anyway. Then I had to chuckle to myself. The big goof didn't have nerve enough to tell the girl to forget about the other guy, but in his own stumbling way

he was going to try to stop her from going to him. He was at his door again now, apologizing. "Gee, Helen, I'm sorry but I'm out of ink, too. Tell you what I'll do, though. I'll run down to the drug store and get some and then see that the letter gets on the mail train. O.K.?"

Helen sounded more than a little disappointed when she murmured, "Why, yes."

I almost stopped him—to give him a little motherly advice—when he came out the front door, but he didn't see me so I kept quiet and just sat there trying to figure out what he was up to. And then I got it as the minutes dragged along. He was going to stand still in the hall. The next minute I nearly groaned aloud because here came Jerry, large as life, with a package in his hand.

He walked slowly, but he'd still get to her with the ink in time, and that letter would be written and sent if nobody did anything to make the big book Helen was in love with him. I was just ready to do something myself when he came to the corner of the house and stopped right under Helen's window. His room was still litting and I could see when in awful struggle he was having with himself, but I guess Cupid decided to take a hand just as he was. Jerry stooped over, after looking around as if he were a little guilty, and started to hide the package.

I sighed with relief, but he straightened up all of a sudden and I thought his bashfulness was going to stop everything I was wrong. He let out a suppressed yelp and then tore into the house. Next minute I heard him pound on Helen's door and then he was uttering, "Helen—Helen—Helen! You don't really want—I mean, here's the ink but I guess you won't. . . ."

Helen gave a glad little cry and then everything was quiet. I couldn't stand it any longer. I had to go out and see it was that made Jerry decide all of a sudden that Helen loved him, so I walked over where he'd been standing. I was pretty sure he couldn't see into Helen's room and, besides, she hadn't switched on her lights at all.

"What I saw should have made me furious, but I was glad, instead, that it had opened his eyes. More of my mock orange blossoms were covered with ink—those ink Helen's loved—ink that had dried.

Dress And Hat

This charming frock and hat for the teen-ager can be made by the young lady herself. Pattern 4766 has ribbon drawn through white eyelid trim. Make hat to match.

Size 4766 comes in sizes 10, 12, 14 and 16. Size 12, frock and hat, takes 2½ yards 36-inch fabric. Send twenty cents (20c) in stamps complete for pattern. Write plainly: Size, Name, Address, to the Pattern Dept., 1201 Broadway, New York City.

A Farmer's Daughter

Woman Officer in Charge of Supplies in M.D. 10

The only woman officer in charge of supplies in M.D. 10 is a good looking, blue-eyed blonde—with a sense of humor.

The name is Andersen—Capt. Olga Andersen—and watch that spelling. "The e" distinguishes us Danes from the Scotch," the captain says with a twinkle in her eyes.

A farmer's daughter, she comes from Molise, a little town in Manitoba where she worked for seven years as a clerk, bookkeeper, postal clerk and in other capacities. . . .

Called the Molise Co-operative Store it was a typical country store where everyone does a little bit of everything.

Enlisting in the Canadian Women's Army Corps on January 20, 1942, the supply lady was a private for five months, then appointed a sergeant and the next stop was at St. Anne de Bellevue for officer training. . . .

Andersen was appointed an officer in charge of supply more than two years ago, and got her captaincy in 1946.

The daughter of Mr. and Mrs. A. H. Andersen, of Molise, is allergic to computers. It seems that, to supply business, you have inspectors, inspectors and . . . more inspectors. . . .

Andersen's main work is bringing supplies and keeping track of the stock she has on hand. "The store is greatly indebted to a woman's sale business. If, for instance, cooks don't intend for certain foods we put out our orders for those particular commodities. Of course, there are compulsory foods on the diet which we are able to order without calculating what the 'must' ration will be. . . .

Andersen's main work is bringing supplies and keeping track of the stock she has on hand. "The store is greatly indebted to a woman's sale business. If, for instance, cooks don't intend for certain foods we put out our orders for those particular commodities. . . .

Is But a Tiny Radio—

Pretty Lou Dean here tunes her new pocket radio which isn't much larger than a cigarette case. It weighs 12 ounces, a complete with batteries and ear tubes and has an ear piece speaker of the hearing aid type.

Have Been Shipping . . . On the growing docks of the great port of Antwerp, Hungary about the size of Montreal's Forum, are piled to the roof with mountains piles of Canadian wheat.

Early in July there were only 45,000 tons of wheat waiting to be shipped to hungry Europe, but one day last June, port officials said, the docks of Antwerp were buried under 100,000 tons.

Through the thriving port of Antwerp Canadian wheat is feeding all of Belgium and Holland, all units of the British 21st Army Group and all American occupation forces in Germany.

Every mill in Belgium and Holland today is going flat out, doing nothing but grinding flour out of wheat from the prairie provinces. Three thousand tons leave daily for the United States.

Andersen's main work is bringing supplies and keeping track of the stock she has on hand. "The store is greatly indebted to a woman's sale business. If, for instance, cooks don't intend for certain foods we put out our orders for those particular commodities. . . .

WARNING!

to all persons planning to move to

**VICTORIA
VANCOUVER
NEW WESTMINSTER
WINNIPEG**

**HAMILTON
TORONTO
OTTAWA
HULL**

No person may move to and rent or occupy family quarters in any of these congested areas without a permit from the Administrator of Emergency Shelter.

Before making arrangements to vacate your present home, be sure that you have other accommodation and a permit to occupy it. Applications for permits should be addressed to the Administrator of Emergency Shelter in the area to which you plan to move.

Every person who rents or occupies family quarters in any of these districts contrary to the order, commits an offence and, in addition to other penalties, will be required to vacate the shelter and the district at his own expense.

(Given under the authority of the Emergency Shelter Regulations, Order-in-Council P.C. 9439, December 12, 1944.)

THE WARTIME PRICES AND TRADE BOARD

THE WORLD'S NEED FOR FOOD

The outlook in Europe in general for sufficient food for this coming fall and winter is bad indeed. Reports from all sides indicate that there will be a serious shortage. Fortunately, Canada has a large surplus of wheat. The problem will be in shipping the wheat to the people who need it. Unfortunately, the war is not ended, and large amounts of shipping are needed to make the long wearisome trip with fighting men, munitions, equipment, and supplies to the Pacific. Those in charge of operations have no enviable task. They are obliged to balance the requirements of shipping space needed to persecute the Pacific war, against the needs for foodstuffs by the hungry people of Europe. So great will be the need for food for a year or more in Europe, particularly for livestock and livestock products, that our farmers will be assisting Canada's effort in the Pacific, and moreover helping the hungry people of Europe, if they will produce as much as they can of these essential products.

There's one thing about war, it does bring sweeping changes in economic lives. New demands for increased production come thick and fast, and we're expected to put on shoulders the wheel and carry on with fewer people to help us. In other words, we have to produce more with less. But but of us we have the scientists and experts in various fields. They are constantly on the job, finding out easier ways of doing things, and developing new processes. Take dehydration for instance. It was pretty much of a side issue before 1939. Our concentrated dried food was all tied up with restaurant apple pie that had been made with leathery bits of apple soaked in water, sweetened, and then placed in a pie. Today's dehydrated apples can be told from the fresh. Well-hardy. That goes for other fruits and vegetables too.

Each homecoming Canadian bomber uses 2,500 gallons of aviation gasoline in his trip back to Canada from England, which makes just another reason why there will be no increase of the gas price.

CANADA'S MOUNTAIN PLAYGROUNDS

Mountain dwellers may sometimes boast that the pictures on the walls of their homes are superfluous because they have a magnificent alpine view framed within every window. Visitors to Canada's mountain parks must surely have the same feeling when they look out of their windows. The pictures on the walls of their rooms must seem mediocre by comparison with those masterpieces of nature for which the parks have become justly famous.

Jasper National Park, with its 4,200 square miles of alpine beauty, is a vast sea of snow capped peaks, its glittering glaciers, deep, swift, turbulent rivers, cascading waterfalls, exquisite lakes and peaceful flower bedecked valleys make up some of the greatest mountain playgrounds in the world. Within its wide boundaries roam some of Canada's finest big-game animals. Everywhere in the Athabasca Trail where once passed a cavalcade of explorers, fur traders and adventurers in the early days of travel to the Pacific.

Banff National Park is distinguished not alone for its superb scenic attractions but because it was the first Canadian territory set aside as a national park. From an area of 10 square miles, reserved 60 years ago around the hot mineral springs, the park has been extended until it now contains 2,850 square miles stretching from the rolling foothills on the east to the continental divide on the west. It contains widely known alpine resorts, Banff and Lake Louise, besides the Upper Hot Springs, the Cave and Basin Hot Springs, and many other features of interest. It is now connected with Jasper Park to the north by one of the greatest scenic highways on the North American continent. Few places in the world enjoy a wider international reputation for scenic charm than Banff National Park.

Waterton Lakes National Park to the south east and Kootenay, Yoho, Glacier and Mount Revelstoke National Parks to the south and east of Banff complete Canada's mountain playgrounds with a combined area of nearly 2,000 square miles. Each has its individuality and appeal in its own, and all are natural wild life sanctuaries. They are connected with Banff and Jasper by good motor roads—except Glacier National Park, which is accessible by railway only. All of these mountain playgrounds have been provided, in varying degrees, with accommodation and recreational facilities for the travelling public, and plans for further development in this direction are moving

awaiting a return to normal peace-time conditions before being put into effect.

Canada's mountain playgrounds may be expected to provide rest and recreation for an ever-increasing volume of tourists in the years to come immediately ahead. Much of the territory covered by these vast mountain parks still remains largely unexplored. Their extent is so immense that they could serve as playgrounds for millions, and their beauty is varied that it is forever fresh and breath-taking.

It is most desirable that all Canadians should be aware of this great national heritage—their mountain kingdom. It belongs to all of them, and, as national parks, will be preserved, inviolate for their descendants.

HERE AND THERE

By the end of 1945 the war will have cost every Canadian an estimated \$1,000.

The world's purest zinc is produced at Fin Flon, Manitoba.

Styrene, the clearer-than-glass plastic, will soon be produced in Canada for the first time, at the rate of about 500,000 pounds a month.

Upwards of 50,000 new houses are planned for Canada in the next twelve months.

Radium exposes even well covered photographic paper the same as if it were left out in bright sunlight. Canada's Dominion Department of Agriculture has made extensive tests to determine what fruits and vegetables have strong enough tastes, smells or colors to withstand the process of dehydration.

A continuous film processor, which can be adapted to all sizes of film and is much easier to control than the one developed by the National Research Council of Canada. At Masford, Ontario, where Canadian volunteers for the Pacific war receive their military training, the treacherous swamp, heavy undergrowth and swarming flies are said to closely approximate conditions in Burma and New Guinea.

The Shipshaw power plant in Quebec, which provides electricity for the Aluminum Company of Canada, has potential kilowatt hour capacity greater than that of Boulder Dam in Colorado.

Total casualties in Canada's armed forces as of May 1, 1944, were 162,954.

Colchicine, a drug with the strange ability to double or triple the number of chromosomes in most plants, is being investigated by Canadian biologists.

Out of work benefits are included in Canada's re-establishment machinery for former armed forces members.

It is possible for men or women to

charged from the services to use their re-establishment credit due them to provide working capital for their civilian business or profession.

When consumer rationing is reintroduced, all persons holding meat in cold storage lockers will have to forfeit meat coupons as the meat is removed, the Wharfedale Times and Trade Board says.

Maximum prices for peaches, plums and pears of the 1945 crop have been set at 1944 price levels except for an increase of five cents per basket in growers' price No. 1 Ontario grown peaches. Maximum prices are also set for a new grade of British Columbia pears for selling this year. Same ceilings are established for imported and domestic fruit and came into force August 6th for imported and domestic peaches and domestic plums August 13 for imported plums and domestic pears and August 20 for imported pears.
